What are MIT's admission requirements? While there are many parts that go into the college app, you should only focus on a few important things: GPA requirements testing requirements, including SAT and ACT Requirements Requirements In this guide we will cover what you need to get into mit of the Massachusetts Institute of Technology and build a strong application. School location: Cambridge, MASSACHUSETTS This school is also known as: Massachusetts Institute of Technology If you want to get in, the first thing you need to look at is the level of acceptance. This tells you how competitive the school is and how serious their requirements are. The admission rate at MIT is 6.7%. For every 100 applicants, only 7 are allowed. This means that the school is extremely selective. Meeting their GPA requirements and SAT/ACT requirements is essential to pass the first round of filters and prove your academic training. If you don't meet their expectations, your chance of getting into near zero. After crossing this hurdle, you need to impress MIT application readers through other application requirements, including extracurricular classes, essays and letters of recommendation. We will cover more below. Want to build the best college application? We can help. PrepScholar Admission is the world's best admissions consulting service. We combine world-class reception consultants with our data-driven reception strategies. We watched thousands of students wash up in their best schools, from public colleges to the Ivy League. We know which college students want to accept. We want you to go to the schools of your dreams. Learn more about taking PrepScholar to maximize your chances of getting an inch of MIT GPA Requirements Many schools specify a minimum GPA requirement, but it is often only the minimum to apply without immediately getting rejected. The GPA requirement that really matters is the GPA you need for a real chance to get in. The average GPA at mit is 4.17. (Most schools use a weighted GPA of 4.0, although some report an unweighted GPA. This school has not officially reported its average GPA, but we rated it here using data from more than 1,000 schools.) With GPA 4.17, MIT requires you to be at the top of your class. You will need almost directly in all classes to compete with other applicants. Also, you have to take tough classes - AP or IB courses - to show that college-level scientists wind up. If you are currently a junior or senior, your GPA is hard to change in time for college applications. If your GPA is at or below high school level of 4.17, you will need a higher SAT or ACT to compensate. This will help you effectively compete with other applicants who have higher GPAs than you. The requirements of the SAT and ACT Each school have different requirements for standardized testing. Most schools require an SAT or ACT, and also require SAT subject tests. You must take either the SAT or ACT to apply to the Massachusetts Institute of Technology. More importantly, you have to do so to have a strong application. MIT SAT Requirements Many schools say they don't have an SAT cut-off score, but the truth is that there are hidden SAT requirements. This is based on the school's average score. The average SAT score at MIT is 1,535 on a scale of 1,600 SAT. This score makes MIT extremely competitive for sat test scores. MIT SAT Score Analysis (New 1600 SAT) is the 25th percentile New SAT score of 1500, and the 75th percentile New SAT score is 1570. In other words, 1500 on New SAT seats is below average, while 1570 will move you above average. Here's a breakdown of the new SAT scores by section: SectionAverage25th Percentile75th Percentile Math790780800 Reading - Writing74577070 Composite153550001570 SAT Assessment Policy Assessment Policy In Your School Is an Important Part of Your Testing Strategy. MIT has a Rating Of Choice Policy Higher Section. It is also known as supercorking. This means you can choose which SAT tests you want to send to school. Of all the points they receive, your app readers will take into account your highest section scores in all SAT testing dates you send. Click below to learn more about how supercorking is critically affecting your test strategy. How does supercorking change the testing strategy? (Click to find out) For example, say you present the following 3 test scores: Section RW Math Composite Test 1 700 300 1000 Test 2 300 700 1000 Test 3 300 300 600 Superscore 700 700 700 1400 Even though that the highest amount you scored on any one test date was 1000, MIT would take your highest section score from all your test dates and then combine them to form your Superscore. In this example, you can raise your composite score from 1,000 to 1,400. This is important for your testing strategy. Since you can choose which tests to send, and MIT forms your Superscore, you can take the SAT as many times as you want and then submit only the tests that give you the highest Superscore. App readers will only see one point. Therefore, if your SAT superscore is currently below 1570, we strongly encourage you to consider preparing for the SAT and re-enact it. You have a very good chance of raising your score, which will greatly increase your chances of getting an inch even better, because of Superscore, you can focus all your energy on one section at a time. If your reading score is lower than your other sections, prepare just for the reading section and then take the SAT. Then focus on the math for the next test and so on. This will give you the highest Superscore possible. Exclusive: Want to know how to improve your SAT score 160 points? Download our free guide to the top 5 strategies you should use to improve your score. This guide was written by Harvard alumni and SAT.60. If you apply strategies in this guide, you you smarter and make huge score improvements. MIT ACT Requirements Just like for the SAT, MIT probably doesn't have a hard ACT cut-off, but if you score too low, your app will get tossed in the bin. The average ACT score at mit is 35. This account makes MIT extremely competitive for the ACT assessment. The ACT's 25th percentage is 34 and the ACT's 75th percentage point is 36. Although MIT probably says they don't have a minimum ACT requirement, if you apply with 34 or below, you'll have a very hard time getting it if you have something else very impressive in your application. There are so many applicants scoring 35 and above that 34 will look academically weak. The ACT Points Policy If you accept the ACT as opposed to the SAT, you have a huge advantage in how you send points and this dramatically affects your testing strategy. Here it is: when you send ACT scores to colleges, you have absolute control over which tests you send. You can take 10 tests and only send your highest. It's not like the SAT, where a lot of schools require you to send all your tests always taken. This means you have a better chance than you think to improve your ACT score. To try to aim for the ACT school requirement of 36 and above, you should try to take the ACT as many times as you can. If you have a final bill that you are happy with, you can only send this bill to all your schools. ACT Superscore policies are by and large, most colleges are not superscore ACT. (Superscore means that the school takes your best section scores out of all the test dates you submit and then combines them in the best composite score). So most schools will just take your high ACT score from a single meeting. However, in our study, we found that MIT actually offer a super-hardcore ACT policy. According to their receptionist: If you pass the same test (SAT, ACT or SAT Subject Test) several times, we will consider the highest score achieved in each section. The Superscoring source is powerful for your testing strategy and you need to make sure that you plan to test accordingly. Of all the points that MIT receives, app readers will take into account your highest score sections in all ACT testing dates you send. Click below to learn more about how supercorking is critically affecting your test strategy. How does supercorking change the testing strategy? (Click to find out) For example, say what you submit to the following 4 tests: English Mathematics Reading Science Composite Test 1 32 16 16 20 Test 2 16 32 16 16 20 Test 3 16 16 3 3 2 16 20 Test 4 16 16 16 32 20 Superscore 32 32 32 32 Even though the highest ACT composite you scored on a single Test date was 20, MIT will take your Score a section from all your test dates and then combine them to form your Superscore. In this example, you can raise your composite score from 20 to 32. This is important for your testing strategy. Because you can choose which tests to send, and MIT shapes your Superscore, you you Take the ACT as many times as you want and then submit only the tests that give you the highest Superscore. App readers will only see one point. Therefore, if your ACT score is currently below 36, we strongly encourage you to consider preparing for the ACT and re-enacting it. You have a very good chance of raising your score, which will greatly increase your chances of getting an inch even better, because of Superscore, you can focus all your energy on one section at a time. If your reading score is lower than your other sections, prepare just for the reading section and then take the ACT. Then focus on the math for the next test and so on. This will give you the highest Superscore possible. Learning from the ACT instead? Want to know how to improve your ACT score by 4 points? Download our free guide to the top 5 strategies you should use to improve your score. This guide was written by Harvard graduates and ACT top scorers. If you apply strategies in this guide, you will learn smarter and make huge score improvements. Sat/ACT Writing Section Requirements as SAT and ACT have an additional essay section. MIT requires you to take the SAT Essay/ACT Writing section. They will use this as another factor in their admission consideration. SAT Subject Test Requirements schools vary in their SAT subject test requirements. Generally, selective schools tend to require them, while most schools in the country do not. Read on to see how many and which ones they require. Typically, your SAT/ACT and GPA are much more weighted than your SAT Subject Tests. If you have a choice between improving your SAT/ACT score or SAT Subject Test scores, you will definitely choose to improve your SAT/ACT score. We did a more detailed study at this school and found the following information. In addition to the ACT/SAT, you must take SAT II in Mathematics and SAT II in Biology, Chemistry or Physics. The source is because this school is extremely selective, getting a high SAT/ACT score and a GPA is vital in order to have a chance to get in. To have the best picture of getting, you should aim for a 75th percentile, with a 1570 SAT or 36 ACT. You should also have a 4.17 GPA or higher. If your GPA is lower than this, you should compensate with a higher SAT/ACT score. For a school as selective as the Massachusetts Institute of Technology, you also have to impress them with the rest of your application. We will cover these details further. But if you're applying with a score below 1570 SAT or 36 ACT, you will unfortunately start with odds against you and have a tiny chance of getting in. / ACT scores and strong apps and you have to compete with them. Want to build the best college application? We can help. PrepScholar reception is the best in the world consulting services. We combine world-class reception consultants with our data-driven reception strategies. We watched thousands of students wash up in their best schools, from public colleges to the Ivy League. We know which college students want to accept. We want you to go to the schools of your dreams. Learn more about taking PrepScholar to maximize your chances of getting an inch What are your chances of enrolling at the Massachusetts Institute of Technology? Chances of coming in with these points: Here's our custom reception calculator. Connect your numbers to see what your chances are to get into. Select test: New SAT ACT NOTE: Your decision to accept depends not only on your GPA and SAT/ACT scores, but also on the complexity of coursework, extracurricular procedures, letters of recommendation and personal statements. This tool provides only a simplified assessment of your chances of getting in. Instead of treating this tool as a crystal ball, we recommend that you consider the big picture of What Your Chance Means: 80-100%: School Safety: Strong Odds of Getting into 50-80%: Likely not to hit 20-50%: Lower but still good chances of getting into school on a wide range of odds: Unlikely to hit, but still have a shot 0-5%: Hard Reach School: Very hard to get into we recommend you to go to school on a wide range of odds. Applying to some security schools will ensure that you have a college to go to, while applying to some schools to reach will give you a chance at getting into school at the top of your range. Each school requires application with bare essentials - a high school transcript and GPA, questionnaire, and other basic information. Many schools, as explained above, also require SAT and ACT scores, as well as letters of recommendation, essays and interviews. We will cover the exact requirements of the Massachusetts Institute of Technology here. The General Unapped Universal App Not Accepted by the Electronic Application Affordable Essay or Personal Statement Required for All Freshmen Letters Recommendations 2 Interviews No Required Application Fee \$75 Fee Waiver Available? Other SAT, ACT or TOEFL notes are available. Two SAT II Subject Tests: One in Mathematics and One in Science Required for A CENT Freshmen or ACT Required SAT Essays or ACT Spelling Mandatory SAT Subject Scores should be submitted to the office of the 15 February Mandatory Years of English Mathematics Science Foreign Language Research Election Stories Offered? Notice Period Regular Admissions Early Action Yes December 1 20 Early Decision We have done a more detailed study in this school admission process and found the following information: Make sure to apply for an interview period that is October 20 for early admission and December 10 for regular admission. MIT recognized 10.8% of those who were interviewed who their interview canceled) last year, but only 1% of those who chose not to interview. Your letters of recommendation should come from humanities/social sciences/language teacher and one math/natural science teacher. Source If you're interested in MIT, you'll probably be interested in these schools as well. We divided them into 3 categories depending on how hard they should get into, compared to the Massachusetts Institute of Technology. These schools have higher SAT averages than MIT. If you improve your SAT score, you will be competitive for these schools. If you're competitive with mit, these schools offer you a similar chance of enrolling. If you are currently competitive for MIT, you should have no problem getting into these schools. If MIT is now out of your reach, you may already be competitive for these schools.
